* Approximate due to variation of chassis weight and weighing method.

** CCC may also be referred to as "payload."

*** If the "trailer" is not equipped with brakes that are activated when the motor home brakes
are applied, the GCWR equals the GVWR plus 1,000 lbs. An exception is any motor home
model for which towing is not permitted. In that case, GCWR equals GVWR. For purposes
of this definition, the "trailer" can be a trailer, a vehicle towed on a dolly, or a vehicle towed
by means of a tow bar.

This weight information is provided for your information and meets the requirements set forth by the Recreation Vehicle Industry Association.

CONSULT OWNER'S MANUAL FOR SPECIFIC WEIGHING INSTRUCTIONS AND TOWING GUIDELINES

**Remember, motor homes should be operated within recommended gross vehicle weight ratings
(GVWR). For safer operating and handling conditions, you must distribute allowable payload
properly. Consult your operator's manual for loading and weighing information.**
